got it, going to use my other email, will send everyone a message now. He will want to know what you are looking to build. Remember start small (MVP, minimum viable product) to test it out, if you rush right to app store may struggle. Aint my first rodeo, but I digress, will send you all an email now introducing everyone.

Thank you,

Hi Joe,

I have copied Jacob, please put him in touch with your guy who builds applications. Ours is a Dating app, don't know if thats in his field.

Thank You,
Eric
